## BULL FRAME (Hip Height)

Frame	1	2	3	4	5	6	7
Finish Weight	750-850	851-950	1051-1150	1151-1250	1251-1350	1251-1350	1351 & up

Frame number 1 steers are the smallest feeders available in the U.S. cattle population, and Frame number 7 steers are the largest. They are expected to weigh within the limits indicated in the chart above at 14 1/2 to 15 months of age. Eighty percent or more are expected to grade Choice under the feeding system used by the commercial feed lots (140 to 200 days on feed.)

	AGE IN MONTHS

\*Frame 3 is average for British breeds.

\*\*Frame 5 is average of Continental breeds.

The base point is 45 inches hip height at 12 months of age for a Frame Score of 3.

Allow two inches for each frame Score at the same age. Allow one inch per month from 5-12 months of age, allow 0.75, 0.50 inches per month from 12 to 18 months.

Daily adjustment may be made as follows:

(No. of days under 365) x .033 + actual height = adjusted height. For adjustments from 365 to 440 days: actual height - (No. of days over 365) x .025 = adjusted height.

Adjustment of 205 days when weights are taken between 160 & 250 days on bull calves is .03, and on heifers is .025.

All buyers invited to Weighing  
 at 8:30 a.m. March 23rd.

## REQUIRED PERFORMANCE AND CONFIRMATION INFORMATION:

- A. The bulls eligible for the 2018 Spring Sale must have been born January 1, 2016 to March 15, 2017.
- B. The sale will begin at 7:00 p.m. on March 23, 2018.
- C. \$5.00 per member per year membership dues will be deducted from sale of bulls sold in sale.
- D. The bull's yearling weight must be taken at 350 to 440 days of age and adjusted to 1100 lbs or more at 365 days. All weaning weights and 365 weights are calculated by the breed associations and must be registered in their respective association. He must be 49 inches tall at hip at 1 year of age. The bull must be in top 50 Percentile for any 2 out of 5 EPD Traits - CE or BW EPD, Weaning Wt. EPD, Yearling Wt. EPD, Milk EPD and Marbling EPD.
- E. If the bull has been used or in service prior to the sale, this will be announced on the auction block. Bulls that have been used must test negative for trichomoniasis and include this on health paper.
- F. Bulls to be eligible for the sale will have to be Owned as a cow-calf unit prior to the time the calf is 120 days of age. Exceptions to this rule, in partnership cattle will be determined by the sale committee.
- G. All bulls must be examined for breeding Soundness by a veterinarian within 60 days of sale, using a standard assay analysis of semen approved by a School of Veterinary Medicine. All bulls must be free of obvious defects of Confirmation unsoundness and will receive a Soundness score at the sale.
- H. Health certificates. A complete general Physical examination of the bull by a Veterinarian is required and vaccination for all five strains of Leptospirosis within 30 days of sale. All bulls must have semen test and scrotum minimum of 33 cm. Yearling bulls must be 32 cm.
- I. Individual weights and soundness scores will be obtained by a committee starting at 8:30 a.m. the day of the sale.

- J. Bulls must meet a weight per day of age requirement at sale weigh in to sell in the sale.
- K. Bulls do not have to be broke to lead or tie.
- L. The bulls that can not be led will be indexed along with the bulls in the sale order.
- M. Bulls that are halter broke must be led with a nose lead. (No exceptions)
- N. Bulls recorded by their individual association will be accepted in the sale and their EPDs must be on the breed association web site.
- O. Potential carriers of all genetic defects must be tested free to qualify for sale.
- P. Sale Consignments are open to surrounding states.

# WELCOME TO OUR 82nd SEMI ANNUAL PERFORMANCE TESTED ALL BREED BULL SALE

We are grateful for your interest in our bulls. We have 13 purebred producers consigning these bulls. These producers are cooperating with area extension livestock specialists in improving and developing their herds. The quality of this sale runs real deep. We will again furnish you all of the information available to us, plus current weights, heights, and scrotal measurements. We will have a soundness score, and visual appraisal by area extension livestock specialists, from area University Extension offices. The EPDs are current.

If anytime we can assist you in any way contact me or any area Extension Livestock Specialist.

Thanks again for attending.

Darrell Aufdenberg

## SOUNDNESS SCORE

Hoof and soundness scoring is not an exact science, but in order to place a subjective score on these bulls for your consideration, a committee evaluates them at the sale considering hooves, joint angularity and movement. A scale of 1 to 10 is used, with 1 being essentially unsound and 10 perfect. Keep in mind that perfection is seldom attained. Conditions that may be encountered and the relative scoring are given below.

### 1 or 2

One or more serious faults that impair their movement and expected longevity. Includes extremes in excessive toe growth, spread toes, hooves that roll under, corns, uneven toes, cracked hooves, too little or too much angle to shoulder, hock and/or pastern resulting in short or long strides. Extremely cow-hocked or bow-legged.

### 3 or 4

Bulls in this range have one or more moderate faults. Would include moderate toe unevenness, curling of one or both toes, an open toe set, a shallow heel depth, and moderately excessive angle or straightness to shoulder, hock and pasterns.

### 5 or 6

Bulls in this range have acceptable soundness with no serious problems. Would include a tendency for curled toes, mild toe unevenness, mildly open toe set, shallow heel, or mild straightness or excessive angle to shoulder, hock and pasterns.

### 7 or 8

Bulls considered basically sound. Good foot size, slight toe curl or open toe set, slightly shallow heel or straight pastern.

### 9 or 10

Perfect or near-perfect in hoof size, toe shape, joint angles and movement. No blemishes.

## SALE ORDER INDEX

The sale index will rank bulls based on %rank within their respective breed to determine sale order using EPD traits WW, YW Milk and maternal and terminal index's of each breed. An average of the % rank will be calculated and the lowest score (highest % rank bull) will be indexed to sell first.

## EPD Percentile Rankings For Production Traits

Percentile rankings are provided on all bulls. This concept ranks bulls within a breed for a similar birth year. The percentile rankings describe where a bull falls within a breed for the EPD traits listed. A bull with a YW EPD percentile rank of 10 is in the top 10% of his breed.

The important thing when evaluating EPD's is to emphasize those traits that you would like to correct in your herd. Selecting a bull to be used on first calf heifers will have totally different EPDs than one to be used as a terminal sire with all offspring going to market. Thus, you must spend as much or more time evaluating your own herd strong points and deficiencies prior to considering which bulls to purchase.

**Calving Ease Direct (CED):** Calving ease direct EPD is expressed as a percentage of unassisted births, with a higher value indicating greater calving ease in **first-calf heifers**. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Calving Ease Maternal (CEM):** Calving ease maternal EPD is expressed as a percentage of unassisted births in first-calf heifers and predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Birth Weight (BW):** Birth weight EPD is measured in pounds and is a predictor of a bull's ability to transmit birth weight to his offspring within a breed. A bull with a low percentile ranking would be expected to sire calves with the **LIGHTEST** birth weight and can be used on replacement heifers. Bulls with high rankings for birth weight will result in calves with the **HEAVIEST** birth weight and should be used on mature cows. Remember that EPDs are within breed comparisons, and breed calving differences should be considered.

**Weaning Weight (WW) and Yearling Weight (YW):** Both weaning and yearling weight EPDs are expressed in pounds. Those bulls with lower percentile ranks would be expected to sire calves with the **HEAVIEST** weights while high rankings will result in calves with the **LOWEST** weight gains.

**Maternal Milk (Milk or MM):** Maternal milk EPDs

are expressed in pounds. They are defined as a predictor of a sire to pass on milk and mothering ability to his offspring. It is part of the calf's weaning weight that it attributed to milk and mothering ability. It is extremely important that the level of milk you need in your herd must MATCH THE ENVIRONMENT (level of NUTRITION and MANAGEMENT). If your calves are light at weaning due to a lack of milk production in the cows then one might want to consider selecting a bull with a higher level of maternal milk. On the other hand if cows are thin and you have difficulty breeding females (especially first and second calf heifers) then one might want to select a moderate or lower maternal milk bull. Milk EPDs are ranked from the MOST (low percentile rank) to LEAST (high percentile rank), with neither of these being desirable for ALL situations.

Accuracy is reported as a decimal between zero and one and an accuracy of close to 1.0 indicates higher reliability in data selection. The greater the accuracy, the more certainty that EPD will not change significantly as additional progeny information is observed. Some breeds report the accuracy of these EPDs as BK, I, P, P+, or PE. These indicate that the EPD is based on pedigree data, or is an interim EPD based on pedigree data and the bull's own performance. I = interim EPD, PE or P = pedigree estimate, BK = backsolution EPD.

It is also extremely important that there are differences between BREEDS. Therefore, 15% rank in one breed (for a trait) does not equate to the same number of pounds as a 15% rank in another breed. Also, when evaluating the EPDs in the Sale Catalog please keep in mind the AVERAGE EPDs for the various breeds. Do NOT COMPARE EPDs across breeds as they work from a different base. This is why we use EPD Percentile Rankings so you know where a bull falls within their breed from the various traits.

FARM GOALS: To bring you bulls that will improve your herd and will make you money.

FOOTNOTES: There are few bulls with performance like this one.

## TERMS AND CONDITIONS

**TIME:** Sale will begin at 7:00 p.m. March 23, 2018.

**BIDDING:** Each animal on which there are two or more bids, will be sold to the highest bidder.

**TERMS:** The terms of the sale are cash. Bring your personal or local bank check.

**DISPUTES:** The auctioneer will settle any and all disputes as to bids by declaring all bids off and reselling the animal in question.

**HANDLING:** Each animal will be purchaser's risk as soon as sold, but will be cared for by the owner for a reasonable period until they are loaded, free of charge to the purchaser, but at his risk of loss or injury. All bulls are sold and will be paid for prior to loading.

**CERTIFICATES:** A certificate of registry and transfer will be furnished for each animal sold by respective breeder.

**BREEDING GUARANTEED:** All bulls have passed a breeding soundness exam at time of sale and are guaranteed breeders. Yearling bulls have passed a breeding soundness exam but should be used lightly. Any animal that has not proven itself a breeder within six months after the sale date, if in healthy condition, and meets the health regulations of the State of Missouri, may be returned to the farm of the seller, at the buyer's expense. The seller reserves the privilege of trying, for a period of six months, to prove the animal a breeder. If proven a breeder, the animal will be returned at the buyer's expense. Should an animal fail to prove a breeder in the specified time period, the sell will refund the full purchase price which shall be considered as full settlement and satisfaction of all claims. All complaints regarding breeding difficulties must be reported in writing by the buyer to the seller within six months.

**ANNOUNCEMENTS:** Announcements from the auction box will take precedence over the printed matter in this catalog.

**CONTRACT:** The above terms and guarantee shall constitute a contract between the buyer and seller of each animal sold.

**SALE ORDER:** Bulls will be sold by index.

**HEALTH:** The cattle have been vaccinated for all strains of Lepto within 30 days of sale date. Health certificate acceptable for any state will be furnished.

**LIABILITY:** All persons who attend this sale do so at their own risk, and the sale committee and the University of Missouri assume no liability, legal or otherwise, for any accidents which may occur.

**Phone or mail in bids accepted by:**  
Darrell Aufdenberg, 573-270-6755  
Sale Day Phone, 573-756-5769.

# Show-Me-Select Replacement Heifers

Missouri's New Source  
of Replacement Females!

**THE SPRING SALE FOR FALL CALVING  
HEIFERS WILL BE MAY 4, 2018 AT THE  
FRUITLAND LIVESTOCK AUCTION. THERE  
WILL BE ABOUT 160 HEIFERS IN THE SALE  
AT FRUITLAND.**

- All heifers have been calthood vaccinated.
- Heifers have met minimum standard for reproductive soundness, pelvic size, body condition and weight and are free of blemishes.
- Heifers have been bred to bulls meeting strict calving ease/birth weight requirements.
- Many of the heifers have been artificially inseminated and are carrying pregnancies by leading bulls in their respective breeds.
- Bred heifers will calve from September 1 to December 1, 2018. Many have been synchronized and will calve in a short time period.

## Service Sire Requirements for Show-Me-Select Replacement Heifers

Bulls of known ID and breed must have serviced heifers. All service sires must have complete EPD information. Major emphasis is placed on **birth weight** and **calving ease** EPD's, but it is recommended to select bulls with balanced EPD's to ensure buyer satisfaction. There are no restrictions in terms of the breed of bull that can be used on Show-Me-Select heifers as long as EPD's for BW and calving ease meet the requirements in the following table.

**Bulls qualifying for this program are indicated as "Show-Me-Select".**

## BREEDING BULLS

If you use natural service with EPDs birth weight or calving ease you must use the numbers listed by each breed on the enclosed chart.

If you use AI the accuracy of each bull's EPD must be .6 with calving ease or birth weight.

**FARM GOALS:** We strive to produce cattle that are functional, relevant, and good-doing with a little extra style and flare. Our extensive AI and ET program gives us the Genetic Advantage to offer cattle from some of the top sires and cows in the industry, to fix the needs of the commercial man and the seed stock producers.

**FOOTNOTES:** We believe in this bull, so much we used him to clean up 2 sets of cows last year. We have some great calves on the ground by him. They already average 70 lbs at birth and grow like crazy.

**FARM GOALS:** We strive to raise good functional cattle that go on to be profitable in the pasture.**FOOTNOTES:** Show-Me-Select Qualified. We purchased the Dam of this bull from our good friend Lawson Burgfeld in the Show-Me-Select heifer sale and couldn't be more pleased at how he has turned out. Typically raising Simmental cattle, we were pleased to see the growth and dimension on this bull and think he could do great things for anyone's program. And he looks great on paper too, for an extra bonus!**LOT 14****ESF AIM J761****ANGUS****CONSIGNED BY:** Eggers Stock Farm, Jackson, MO**CALVED:** 8/31/16**TATTOO:** J761**REG.
